Why you should NEVER swim in reservoirs...

Reservoirs might seem like a great place to cool off, but there are lots of dangers hidden under the water.
If your friends ask you to swim in a reservoir, always say no!

Can you find and circle 6 dangers of swimming in a reservoir?

- Reservoirs are in the countryside.
- The water in reservoirs can be freezing cold.
- The sign that reads 'hospital 26 miles' is a reminder of the dangers.
- The water level can change, affecting swimming conditions.
- If you get into trouble, it's difficult to get out.
- If you swim too close to the water's edge, you could be caught in a strong current.
